# GEOGRAPHY · Agriculture and agro-based activities in India and Andhra Pradesh

**UNDERSTAND IT FIRST**

**What is it? Agriculture** is growing crops and rearing animals for food, fibre and income. It still employs about **45%** of India's workers but gives only about **16–18%** of national output (GVA), so incomes per farmer are low. What grows where depends on **soil, rainfall, temperature and irrigation** (Days 32–36). **Agro-based activities** (dairy, poultry, fisheries, sericulture, food processing, sugar, textiles) add value and jobs. Learn it as **importance → seasons → major crops and where → revolutions → problems → policy and schemes → allied activities → Andhra Pradesh**.

## 1. Seasons and major crops

Cropping seasons

| Crop | Conditions | Leading States (check the latest data) |
|---|---|---|
| **Rice** | Kharif; hot and wet (above about **25°C**, over **100 cm** rain or irrigation); alluvial and clayey soils. | **West Bengal, UP, Punjab, Telangana, AP, Odisha**; India is the **largest exporter** and second-largest producer. |
| **Wheat** | Rabi; cool growing season, bright sun at ripening; **50–75 cm** rain or irrigation. | **UP, MP, Punjab, Haryana, Rajasthan**; India is the **second-largest** producer. |
| **Millets, pulses, oilseeds** | Dry-land crops on poor soils; pulses **fix nitrogen**. **2023** was the **International Year of Millets** ('Shree Anna'). | Millets: **Rajasthan, Karnataka, Maharashtra**; pulses: **MP, Rajasthan, Maharashtra** (India **largest producer and consumer**, yet imports); oilseeds: **Rajasthan, MP, Gujarat**; groundnut: **Gujarat**, AP (Anantapur). |
| **Cash crops** | **Sugarcane** (hot, wet, long season), **cotton** (black soil, **210 frost-free days**), **jute** ('golden fibre'; alluvium, heavy rain), **tea** (hill slopes, well-drained, heavy rain), **coffee** (shade, hills), **rubber** (equatorial). | Sugarcane: **UP, Maharashtra, Karnataka**; cotton: **Gujarat, Maharashtra, Telangana**; jute: **West Bengal**; tea: **Assam, West Bengal**; coffee: **Karnataka** (about 70%); rubber: **Kerala**; spices: Kerala, AP (chillies). |

## 2. Revolutions, problems and policy

Agricultural revolutions

- **World ranks:** India is **first in milk, pulses, jute** and **millets**, and **second in rice, wheat, sugarcane, fruits and vegetables, cotton** (among the top two), and a leading **fish** producer. **Problems:** small and fragmented holdings (average about **1.1 hectares**; over **85%** small and marginal farmers), dependence on **monsoon**

(only about **half** of net sown area is irrigated), low productivity, **post-harvest losses**, weak markets and middlemen, debt, soil and water depletion, climate risk.

- **Policy: Minimum Support Price (MSP)** for **22 crops** (plus **FRP** for sugarcane), recommended by the **Commission for Agricultural Costs and Prices (CACP)**, at least **1.5 times** the cost of production (A2+FL) since 2018. **PM-KISAN (2019)**: **₹6,000 a year** in three instalments to land-holding farmers; **PM Fasal Bima Yojana (2016)** (crop insurance; farmer premium **2%** kharif, **1.5%** rabi, **5%** commercial/horticulture); **Kisan Credit Card (1998)**; **e-NAM (2016)** online mandis; **Soil Health Card (2015)**; **PM Krishi Sinchayee Yojana (2015; 'Per Drop More Crop')**; **10,000 FPOs**; **Agriculture Infrastructure Fund (₹1 lakh crore)**; **Digital Agriculture Mission (2024; AgriStack, farmer IDs)**; **PM Dhan-Dhaanya Krishi Yojana (2025)** for **100 low-yield districts**; **Mission for Aatmanirbharta in Pulses**; **National Mission on Natural Farming (2024)**.
- **Agro-based activities: dairy** (Operation Flood; **Amul** model co-operatives; **Rashtriya Gokul Mission** for native breeds); **poultry** (AP, TN, Telangana lead in eggs); **fisheries** (**PM Matsya Sampada Yojana, 2020**; India is the **second-largest** fish producer; **shrimp** is a top seafood export); **sericulture** (India second in silk; **Karnataka** first; AP for **tussar** and mulberry); **food processing** (PMKSY 'Sampada', **mega food parks**, **PLI for food processing**); agro-industries: **sugar, cotton textiles, jute mills, vegetable oils, rice mills**.

### 3. Andhra Pradesh

**OTHER ANGLES ASKED IN EXAMS**

**Other angles asked:** (1) **Swaminathan Commission (National Commission on Farmers, 2004–06)** suggested MSP at **cost + 50%** (C2). (2) **Cropping intensity** = gross cropped area ÷ net sown area × 100. (3) **Shifting cultivation** has local names: **jhum** (NE), **podu** (AP, Telangana), **kumari** (Western Ghats).
