Notes version: 14 Nov 00:20 IST (if this time is old, reload the page)

GEOGRAPHY · Major industries and industrial regions

UNDERSTAND IT FIRST

What is it? Industry (manufacturing) turns **raw materials into more valuable goods**: iron ore into steel, cotton into cloth, sand into chips. It creates jobs and exports and is the **secondary sector** of the economy (about **a quarter** of India's GVA, with manufacturing about **15–17%**). An industry is located where its **costs are lowest**: near **raw materials** (if they lose weight in processing, like steel and sugar), near **markets** (if the product is bulky or perishable), or where **power, water, labour, transport, capital and government support** are available. Learn it as **location factors → kinds and policies → each major industry and its centres → industrial regions and corridors → Andhra Pradesh**.

1. Kinds and policies

- **Kinds:** by **raw material** (agro-based: cotton, jute, sugar, food; mineral-based: steel, cement, aluminium), by **ownership** (public, private, joint, co-operative like **Amul**), by **size** (large, MSME), by **role** (**basic/key** industries like steel that feed others; **consumer** industries). **MSME** definition (revised **2020**, raised again in **Budget 2025**): based on **investment and turnover** together; micro up to about **₹2.5 crore** investment and **₹10 crore** turnover, small up to **₹25 crore / ₹100 crore**, medium up to **₹125 crore / ₹500 crore** (check the latest). MSMEs employ the most people after agriculture.
- **Policies: Industrial Policy Resolution 1948** (mixed economy); **1956** (the 'economic constitution': **Schedule A** 17 industries for the State, **Schedule B** mixed, **Schedule C** private; heavy-industry focus of the **Mahalanobis** Second Plan); **licence-permit raj**; **New Industrial Policy 1991** (licensing abolished except a few; public-sector reservation cut; see Day 31). Later: **Make in India (2014)**, **Production Linked Incentive (PLI)** schemes in **14 sectors (2020)**, **National Manufacturing Mission** (Budget 2025), **PM Gati Shakti (2021)** for logistics, **National Logistics Policy (2022)**. **Index of Industrial Production (IIP)**, base **2011–12**, by **NSO**; the **eight core industries** (coal, crude oil, natural gas, refinery products, fertilisers, steel, cement, electricity) make up about **40%** of IIP, with **refinery products** the heaviest.

2. Major industries

Major integrated steel plants

Industry	Location logic and centres
Iron and steel	Needs **iron ore, coking coal, limestone, manganese**: so plants cluster in the **Chota Nagpur–Odisha–Chhattisgarh** belt. **TISCO, Jamshedpur (1907)**; **IISCO** Burnpur; **Visvesvaraya** (Bhadravati); **Bhilai** (USSR), **Rourkela** (West Germany), **Durgapur** (UK) in the Second Plan; **Bokaro** (USSR); **Salem**; **Visakhapatnam (RINL, 1992)**, the **first shore-based** plant. **SAIL (1973)** runs most public plants. India is the **second-largest crude steel producer** (since 2018); **National Steel Policy 2017** targets **300 million tonnes** capacity by 2030–31.

Textiles and jute	**First cotton mill: Bombay, 1854** (Cowasji Davar); centres near cotton and humid ports: **Mumbai, Ahmedabad ('Manchester of India'), Coimbatore ('Manchester of South India'), Kanpur ('Manchester of the North'), Surat** (synthetics), **Tiruppur** (knitwear), **Ludhiana** (woollens). Textiles are the second-largest employer after farming. **Jute**: **first mill Rishra (1855)**, along the **Hugli** in West Bengal (raw jute, water, Kolkata port).
Sugar, cement, aluminium, chemicals	**Sugar** mills sit in **cane fields** (cane loses sucrose quickly): **UP, Maharashtra, Karnataka**, many as co-operatives. **Cement**: first factory **Chennai (1904)**; near **limestone** (MP, Rajasthan, **AP**, Karnataka); India **second-largest**. **Aluminium** needs **cheap power**: **Hindalco (Renukoot)**, **NALCO (Angul)**, **BALCO (Korba)**. **Petrochemicals and refining**: **Jamnagar** (the world's largest refining complex, Reliance), Mumbai, Vadodara, Panipat.
Autos, IT, pharma, electronics	**Autos** (footloose, need skills and suppliers): **Chennai ('Detroit of India')**, **Pune**, **Gurugram–Manesar**, Sanand; India is among the top three car markets. **IT**: **Bengaluru ('Silicon Valley of India')**, Hyderabad, Pune, Chennai, Noida. **Pharma**: **Hyderabad ('bulk drug capital')**, Ahmedabad, Baddi (HP), **Visakhapatnam**; India is the '**pharmacy of the world**' (generics, vaccines). **Electronics/mobiles**: **Noida, Chennai–Sriperumbudur**, Bengaluru; **semiconductor** fabs and assembly plants approved in Gujarat (Dholera, Sanand), Assam and others under the **India Semiconductor Mission**.

3. Industrial regions, corridors and Andhra Pradesh

Major industrial regions

- **Industrial corridors** (National Industrial Corridor Development Programme): **Delhi–Mumbai (DMIC**, with Japan; Dholera smart city), **Chennai–Bengaluru (CBIC)**, **Amritsar–Kolkata**, **East Coast Economic Corridor** (with the **Vizag–Chennai Industrial Corridor**, supported by the **ADB**), **Bengaluru–Mumbai**, **Hyderabad–Bengaluru**, **Hyderabad–Nagpur**, **Odisha Economic Corridor**; in **August 2024** the Centre approved **12 new industrial smart cities**, including **Orvakal** and **Kopparthy** in AP. Budget 2026–27 added an **integrated East Coast Industrial Corridor**.
- **Andhra Pradesh: Visakhapatnam–Anakapalli** (Vizag Steel/RINL, **HPCL refinery**, **Hindustan Shipyard**, **Jawaharlal Nehru Pharma City at Parawada**, the **Naval Dockyard**; a large **AI data-centre hub** announced by Google in 2025); **Kakinada** (fertilisers, refinery-SEZ, aquaculture exports); **Sri City** (Tirupati district; a large multi-product SEZ near Chennai); **Krishnapatnam** (Nellore; port, power); **Penukonda** (Sri Sathya Sai; **Kia** car plant, 2019); **Orvakal** (Kurnool; industrial node, airport); **Kopparthy** (YSR Kadapa; electronics cluster); cement belts (**Yerraguntla, Jaggayyapeta, Nandyal**); **APIIC** develops industrial parks. AP ranks high in **Ease of Doing Business** reform rankings. (Check the status of announced projects such as new refineries and steel plants.)

OTHER ANGLES ASKED IN EXAMS

Other angles asked: (1) **Weber's theory**: weight-losing raw materials pull industry to the source; 'footloose' industries (IT, electronics) can locate anywhere. (2) **Maharatna, Navratna, Miniratna** status for public enterprises (e.g. SAIL, BHEL, ONGC are Maharatnas). (3) **Special Economic Zones Act, 2005**. (4)

Industrial sickness and the **IBC 2016** link. (5) **Bhilai** is in Chhattisgarh, **Rourkela** in Odisha, **Durgapur** in West Bengal, **Bokaro** in Jharkhand: State-matching is a common trap. (6) **Ankleshwar** (Gujarat) is a chemicals hub; **Moradabad** is brassware; **Firozabad** glass bangles; **Agra** leather; **Kanpur** leather.

EXAM TRAP

Location: raw material (weight-losing), market, power, water, labour, transport, capital, policy; kinds: agro/mineral; public/private/joint/co-op; basic/consumer; MSME (₹2.5/10 cr micro; 25/100 small; 125/500 medium); IPR 1948, 1956 (Schedules A 17, B, C; Mahalanobis), NIP 1991; Make in India 2014; PLI 14 sectors 2020; Gati Shakti 2021; NLP 2022; National Manufacturing Mission 2025; IIP base 2011–12 (NSO); 8 core ~40% (refinery heaviest); steel: TISCO 1907; Bhilai (USSR, Chh), Rourkela (W Germany, Odisha), Durgapur (UK, WB), Bokaro (USSR, Jharkhand); Vizag RINL 1992 first shore-based; SAIL 1973; India 2nd; NSP 2017 300 Mt by 2030–31; cotton: Bombay 1854; Ahmedabad (Manchester of India), Coimbatore (South), Kanpur (North); Tiruppur knitwear; jute: Rishra 1855, Hugli; sugar near cane (UP); cement: Chennai 1904; India 2nd; aluminium: Hindalco Renukoot, NALCO Angul, BALCO Korba; Jamnagar largest refinery; Chennai Detroit; Bengaluru Silicon Valley; Hyderabad bulk drugs; ISM fabs (Dholera, Sanand, Assam); regions: Mumbai–Pune, Hugli, Bengaluru–Chennai–Coimbatore, Gujarat, Chota Nagpur, Gurugram–Delhi, Vizag–Guntur; corridors: DMIC (Japan), CBIC, Amritsar–Kolkata, ECEC/VCIC (ADB); 12 smart cities 2024 incl. Orvakal, Kopparthy; AP: RINL, HPCL, HSL, Pharma City Parawada, Google AI hub (2025), Kakinada, Sri City, Krishnapatnam, Kia Penukonda 2019, APIIC; SEZ Act 2005.

Test yourself: 8 questions (tap an option to see the answer)

PRACTICE

Consider the following statements:
1. Bhilai steel plant was set up with Soviet help.
2. Rourkela steel plant was set up with West German help.
3. Durgapur steel plant was set up with British help.
4. Bokaro steel plant was set up with American help.
Which of the above are correct?

A. 1 and 2 only

B. 2, 3 and 4 only

C. 1, 2 and 3 only

D. 1, 2, 3 and 4

Answer: C. Bokaro was built with Soviet help.

PRACTICE

Match List-I (city) with List-II (title):

List-I (city)	List-II (title)
A. Ahmedabad	1. Bulk drug capital of India
B. Chennai	2. Silicon Valley of India
C. Bengaluru	3. Detroit of India
D. Hyderabad	4. Manchester of India

(1) A → 3 B → 4 C → 2 D → 1

(2) A → 4 B → 3 C → 2 D → 1

(3) A → 4 B → 2 C → 3 D → 1

(4) A → 4 B → 3 C → 1 D → 2

Answer: (2) Ahmedabad: Manchester; Chennai: Detroit; Bengaluru: Silicon Valley; Hyderabad: bulk drugs.

PRACTICE

Which one of the following statements is NOT correct?

A. India's first modern cotton mill was set up in Bombay in 1854.

B. Jute mills are concentrated along the Hugli in West Bengal.

C. India is the second-largest producer of crude steel.

D. Aluminium smelters are located mainly where labour is cheapest, ignoring power supply.

Answer: D. Aluminium smelting uses huge amounts of electricity, so plants locate near cheap power (e.g. Renukoot, Korba, Angul).

PRACTICE

Assertion (A): Sugar mills in India are located close to sugarcane fields.
Reason (R): Sugarcane is a weight-losing raw material that also loses its sucrose content quickly after cutting.
Choose the correct answer:

A. Both A and R are true and R is the correct explanation of A

B. Both A and R are true but R is not the correct explanation of A

C. A is true but R is false

D. A is false but R is true

Answer: A. Both are true, and R explains why mills are built near the fields.

PRACTICE

A steel plant was built on the coast so that it could import coking coal by sea; it was India's first shore-based integrated steel plant. Which one is it?

A. Bhilai

B. Visakhapatnam (RINL)

C. Bokaro

D. Rourkela

Answer: B. Vizag Steel (Rashtriya Ispat Nigam Ltd), commissioned in 1992, is India's first shore-based integrated steel plant.

PRACTICE

Consider the following statements:
I. The Industrial Policy Resolution of 1956 divided industries into Schedules A, B and C.
II. The eight core industries account for about 40% of the Index of Industrial Production.
Which of the statements given above is/are correct?

A. I only

B. II only

C. Both I and II

D. Neither I nor II

Answer: C. Both are correct.

PRACTICE

Consider the following pairs (place – industry):
1. Jamnagar – petroleum refining

2. Tiruppur – knitwear

3. Renukoot – coal mining

4. Firozabad – glass bangles

How many of the above pairs are correctly matched?

A. Only one pair

B. Only two pairs

C. Only three pairs

D. All four pairs

Answer: C. Renukoot (UP) is known for aluminium (Hindalco); the other three are correct.

PRACTICE

A car company sets up a large plant at Penukonda in Andhra Pradesh in 2019. Which company and district is this?

A. Kia, Sri Sathya Sai district

B. Tata, Srikakulam district

C. Hyundai, Krishna district

D. Maruti, Prakasam district

Answer: A. Kia's plant at Penukonda (earlier Anantapur, now Sri Sathya Sai district) began production in 2019.

RECALL BOX: CLOSE THE NOTES AND WRITE THESE IN YOUR OWN WORDS

1. Write the location factors, kinds of industry, the policies from 1948 to PLI, and IIP and core industries. 2. Write each major industry with its logic, centres, years and partners. 3. Write the industrial regions, corridors and AP's industrial hubs.

ECONOMY · Balance of Payments (BOP) and FDI

UNDERSTAND IT FIRST

What is it? The **Balance of Payments** is a **record of all economic transactions** between a country's residents and the **rest of the world** in a year: goods, services, income, gifts and capital flows. Like a household's accounts, money **coming in** (exports, remittances, foreign investment) is a **credit** and money

going out (imports, investment abroad) a **debit**. Overall, the BOP always **balances**: any gap is met by changes in **foreign exchange reserves**. **Foreign Direct Investment (FDI)** is long-term investment by foreigners with a say in management, and is the most stable way to finance a deficit. Learn it as **the accounts → India's pattern → the 1991 crisis and convertibility → exchange rate and reserves → latest numbers → FDI vs FPI → FDI rules and trends**.

1. The accounts and India's pattern

Balance of Payments: the accounts

- **Current account** = **trade in goods** (visible) + **invisibles**: **services** (software, travel, transport), **primary income** (interest, dividends, wages) and **secondary income** (transfers, mainly **remittances**). **Capital (and financial) account** = **FDI, FPI**, external commercial borrowing (**ECB**), external aid, **NRI deposits**, trade credit. **Errors and omissions** cover gaps. A **current account deficit (CAD)** must be financed by capital inflows or by using reserves.
- **India's pattern:** a large **merchandise trade deficit** (imports of **crude oil, gold, electronics, coal**) is partly offset by a big **services surplus** (IT and business services) and **remittances** (India is the **world's largest recipient**, over **$130 billion** a year). So the **CAD** is usually small: about **0.6% of GDP** in both **2024–25 ($22.9 bn)** and **2025–26 ($25.2 bn)**; India even ran a **current account surplus** in some quarters (e.g. **$7.1 billion in January–March 2026**). In **2025–26**, **FPI** saw a net **outflow of about $16 billion** and net FDI was modest, so **reserves fell** on a BOP basis. A CAD above about **2.5–3% of GDP** is seen as risky.

2. Crisis, convertibility, exchange rate and reserves

- **1991 crisis** (Day 31): reserves fell to about **two weeks of imports**; gold was pledged; the rupee was **devalued**. Reforms: the **Liberalised Exchange Rate Management System (LERMS, 1992)** with dual rates, then a **market-determined exchange rate (1993)**; **full current account convertibility (August 1994)**, when India accepted **IMF Article VIII**; **capital account** convertibility only **partial** (Tarapore Committees, 1997 and 2006). **FERA (1973)** gave way to **FEMA (1999)**: foreign exchange offences became **civil**, not criminal.
- **Exchange rate:** India has a **managed float**: the market sets the rupee's value, but the **RBI** buys or sells dollars to smooth sharp swings. **Depreciation** (rupee weaker) makes **exports cheaper abroad** and **imports costlier**; it can raise inflation via oil. **Devaluation** is a deliberate cut under a fixed system. **REER/NEER** compare the rupee with a basket of currencies. **Forex reserves** (foreign currency assets, **gold**, **SDRs**, IMF reserve position) were around **$650–700 billion** in 2025–26 (check the RBI's weekly data); India is among the top five holders. **Rupee trade settlement** (2022) and **UPI links abroad** promote the rupee's international use.

3. Foreign Direct Investment

FDI in India: routes and limits

Point	Details

FDI vs FPI	An investment of **10% or more** of a listed company's equity is **FDI** (lasting interest, management say, brings **technology and jobs**); below 10% is **FPI** (portfolio: shares and bonds, '**hot money**' that can leave quickly). FPIs are regulated by **SEBI**; FDI policy by **DPIIT** (Commerce Ministry) and FEMA rules by the **RBI**.
Trends	**Gross FDI inflows** are about **$80 billion** a year, but **net FDI** has fallen sharply because of **repatriation** by foreign investors and **Indian firms investing abroad** (net FDI about **$1 bn in 2024–25** and **$6.9 bn in 2025–26**). Top **sources**: **Singapore, Mauritius, USA**, Netherlands, Japan, UAE. Top **sectors**: **services**, **computer software and hardware**, trading, telecom, autos, **non-conventional energy**. Top **States**: **Maharashtra**, Karnataka, Gujarat, Delhi, Tamil Nadu.
Other flows	**ECB** (foreign loans to Indian firms, regulated by the RBI); **NRI deposits** (FCNR, NRE); **Overseas Direct Investment** by Indian firms; **Bilateral Investment Treaties** (model BIT 2016); India's **largest trading partners** are the **USA** (largest export market), **China** (largest source of imports), UAE.

OTHER ANGLES ASKED IN EXAMS

Other angles asked: (1) **Remittances** are **secondary income** in the current account, not capital account. (2) **Sterilisation**: when the RBI buys dollars it releases rupees, then absorbs them via OMOs. (3) **Impossible trinity**: a country cannot have a fixed exchange rate, free capital flows and independent monetary policy all at once. (4) **J-curve**: after depreciation, the trade balance first worsens, then improves. (5) **Participatory notes (P-notes)** are offshore derivatives used by FPIs. (6) **'Twin deficit'** = fiscal deficit + CAD. (7) **SDR** basket: US dollar, euro, Chinese yuan, yen, pound.

EXAM TRAP

BOP = all transactions with the rest of the world; always balances via reserves; **current account = goods + invisibles (services, primary income, secondary income/remittances)**; **capital account = FDI, FPI, ECB, aid, NRI deposits**; **India: big trade deficit (oil, gold, electronics), services surplus, remittances >$130 bn (world's largest)**; **CAD ~0.6% (2024–25 $22.9 bn; 2025–26 $25.2 bn); Q4 FY26 surplus $7.1 bn; FPI outflow ~$16 bn (2025–26); reserves drawn down**; **>2.5–3% risky**; **1991: 2 weeks of imports; devaluation; LERMS 1992; market rate 1993; current account convertibility Aug 1994 (IMF Art VIII); capital account partial (Tarapore 1997, 2006)**; **FERA 1973 → FEMA 1999 (civil)**; **managed float; depreciation: exports cheaper, imports dearer**; **REER/NEER**; **reserves ~$650–700 bn (FCA, gold, SDR, IMF position)**; **rupee trade 2022**; **FDI ≥10% (DPIIT; RBI under FEMA); FPI <10% (SEBI)**; **automatic vs government route**; **caps: insurance 100% (2025), defence 74% automatic, private banks 74%, PSBs 20%, multi-brand retail 51%, print media 26%**; **prohibited: lottery, gambling, chit funds, Nidhi, real estate business, tobacco, atomic energy**; **Press Note 3 (2020): land-border countries need approval**; **gross FDI ~$80 bn; net FDI low (repatriation, outward FDI)**; **sources: Singapore, Mauritius, USA; sectors: services, software; States: Maharashtra first**.

Test yourself: 8 questions (tap an option to see the answer)

PRACTICE

Consider the following statements:

1. The current account records trade in goods and services, income and transfers.

2. FDI is recorded in the capital (financial) account.

3. India is the world's largest recipient of remittances.

4. India has had a current account surplus every year since 1991.

Which of the above are correct?

A. 1 and 2 only

B. 1, 2 and 3 only

C. 2, 3 and 4 only

D. 1, 2, 3 and 4

Answer: B. India usually runs a current account deficit; surpluses have occurred only in a few years or quarters.

PRACTICE

Match List-I (step) with List-II (year):

List-I (step)	List-II (year)
A. LERMS	**1.** 2020
B. Full current account convertibility	**2.** 1999
C. FEMA enacted	**3.** 1994
D. Press Note 3 on FDI from neighbouring countries	**4.** 1992

(1) A → 3 B → 4 C → 2 D → 1

(2) A → 4 B → 2 C → 3 D → 1

(3) A → 4 B → 3 C → 1 D → 2

(4) A → 4 B → 3 C → 2 D → 1

Answer: (4) LERMS 1992; current account convertibility 1994; FEMA 1999; Press Note 3 in 2020.

PRACTICE

Which one of the following statements is NOT correct?

A. A foreign holding of 10% or more in a listed company is treated as FPI.

B. FPIs are regulated by SEBI.

C. FDI policy is framed by DPIIT.

D. Investors from countries sharing a land border with India need government approval for FDI.

Answer: A. A holding of 10% or more is FDI; below 10% is FPI.

PRACTICE

Assertion (A): India runs a large merchandise trade deficit.

Reason (R): India's services imports are larger than its services exports.

Choose the correct answer:

A. Both A and R are true and R is the correct explanation of A

B. Both A and R are true but R is not the correct explanation of A

C. A is true but R is false

D. A is false but R is true

Answer: C. A is true. R is false: India has a large services surplus, which offsets much of the goods deficit.

PRACTICE

A foreign company buys a 26% stake in an Indian manufacturing firm and gets two seats on its board. How is this investment classified?

A. Foreign Portfolio Investment

B. External Commercial Borrowing

C. NRI deposit

D. Foreign Direct Investment

Answer: D. A stake of 10% or more with a lasting management interest is FDI.

PRACTICE

Consider the following statements:

I. In 2025–26, India's current account deficit was about 0.6% of GDP.

II. In 2025–26, India received record net inflows of foreign portfolio investment.

Which of the statements given above is/are correct?

A. I only

B. II only

C. Both I and II

D. Neither I nor II

Answer: A. FPI saw a net outflow of about $16 billion in 2025–26.

PRACTICE

Consider the following pairs (sector – FDI position):

1. Multi-brand retail – up to 51% through the government route

2. Insurance – capped at 26%

3. Defence – up to 74% through the automatic route

4. Atomic energy – 100% through the automatic route

How many of the above pairs are correctly matched?

A. Only one pair

B. Only two pairs

C. Only three pairs

D. All four pairs

Answer: B. Pairs 1 and 3 are correct. The insurance cap was raised (to 100% in 2025); FDI in atomic energy is prohibited.

PRACTICE

The rupee depreciates sharply against the US dollar. What is the most likely immediate effect?

A. Imports become cheaper

B. Indian exports become costlier for foreign buyers

C. Exports become more competitive and imports costlier

D. There is no effect on trade

Answer: C. A weaker rupee makes Indian goods cheaper in dollars and foreign goods (like oil) dearer in rupees.

RECALL BOX: CLOSE THE NOTES AND WRITE THESE IN YOUR OWN WORDS

1. Write the BOP accounts and items, and India's pattern with the latest figures. 2. Write the 1991 crisis, LERMS, convertibility, FERA to FEMA, the exchange rate regime and reserves. 3. Write FDI vs FPI, routes, caps, prohibited sectors, Press Note 3, and sources, sectors and States.

TIMED PRACTICE · Geography: 30 questions in APPSC pattern (60 minutes)

UNDERSTAND IT FIRST

How to take this test: set a timer for **60 minutes**. Close all notes. **Write your choice on paper first**, then tap to check. Score: **+1** correct, **−1/3** wrong. **Target: 22 or more.** The questions cover **Days 25–40**: Earth, physiography, climate, rivers, soils and forests, resources, agriculture, industry, disasters and Andhra Pradesh.

PRACTICE

1. Consider the following statements:
1. The Earth's axis is tilted at about 23.5° to the vertical.
2. The summer solstice in the northern hemisphere falls on about 21 June.
3. The Earth is closest to the Sun (perihelion) in early January.
4. Indian Standard Time is based on 82°30′ E.
Which of the above are correct?

A. 1 and 2 only

B. 2, 3 and 4 only

C. 1, 2 and 3 only

D. 1, 2, 3 and 4

Answer: D. All four are correct.

PRACTICE

2. Match List-I (discontinuity) with List-II (location):

List-I (discontinuity)	List-II (location)
A. Gutenberg	1. Between outer and inner core

B. Mohorovičić	**2.** Between upper and lower crust
C. Conrad	**3.** Between crust and mantle
D. Lehmann	**4.** Between mantle and core

(1) A → 4 B → 3 C → 2 D → 1

(2) A → 3 B → 4 C → 2 D → 1

(3) A → 4 B → 2 C → 3 D → 1

(4) A → 4 B → 3 C → 1 D → 2

Answer: (1) Gutenberg: mantle–core (2,900 km); Moho: crust–mantle; Conrad: upper–lower crust; Lehmann: outer–inner core.

PRACTICE

3. Which one of the following statements is NOT correct?

A. The Himadri is the highest and most continuous Himalayan range.

B. Duns are longitudinal valleys found in the Shiwaliks.

C. The Shiwaliks are the highest range of the Himalayas.

D. The Purvanchal hills lie in north-east India.

Answer: C. The Shiwaliks are the lowest and outermost range; the Himadri is the highest.

PRACTICE

4. Assertion (A): The Tamil Nadu coast remains comparatively dry during the south-west monsoon.
Reason (R): Kerala receives the highest rainfall in India.
Choose the correct answer:

A. Both A and R are true and R is the correct explanation of A

B. Both A and R are true but R is not the correct explanation of A

C. A is true but R is false

D. A is false but R is true

Answer: C. A is true (TN lies in the rain-shadow and parallel to the Bay branch). R is false: the highest rainfall is at Mawsynram–Cherrapunji in Meghalaya.

PRACTICE

5. A place in Meghalaya, on the south-facing slopes of the Khasi hills, records one of the highest average annual rainfalls in the world. Which place is it?

A. Mawsynram

B. Agumbe

C. Mahabaleshwar

D. Shillong

Answer: A. Mawsynram (with nearby Cherrapunji/Sohra) gets the heaviest rain as moist winds rise up the funnel-shaped Khasi hills.

PRACTICE

6. Consider the following statements:
I. Chilika is a freshwater lake.
II. Wular lake is in Rajasthan.
Which of the statements given above is/are correct?

A. I only

B. II only

C. Both I and II

D. Neither I nor II

Answer: D. Chilika (Odisha) is a brackish-water lagoon; Wular is in Jammu and Kashmir.

PRACTICE

7. Consider the following pairs (dam – river):
1. Bhakra Nangal – Sutlej
2. Hirakud – Mahanadi
3. Sardar Sarovar – Tapi
4. Tehri – Yamuna
How many of the above pairs are correctly matched?

A. Only one pair

B. Only two pairs

C. Only three pairs

D. All four pairs

Answer: B. Sardar Sarovar is on the Narmada; Tehri is on the Bhagirathi.

PRACTICE

8. Consider the following statements:

1. Tropical deciduous forests are the most widespread in India.

2. The Sundarbans form the largest mangrove area in India.

3. Madhya Pradesh has the largest forest area among States.

4. The National Forest Policy 1988 aims at 50% of land under forest.

Which of the above are correct?

A. 1 and 2 only

B. 2, 3 and 4 only

C. 1, 2 and 3 only

D. 1, 2, 3 and 4

Answer: C. The 1988 policy aims at 33% (two-thirds in the hills).

PRACTICE

9. Match List-I (place) with List-II (mineral):

List-I (place)	List-II (mineral)
A. Jharia	1. Diamonds
B. Bailadila	2. Copper
C. Khetri	3. Iron ore
D. Panna	4. Coking coal

(1) A → 4 B → 3 C → 2 D → 1

(2) A → 3 B → 4 C → 2 D → 1

(3) A → 4 | B → 2 | C → 3 | D → 1

(4) A → 4 | B → 3 | C → 1 | D → 2

Answer: (1) Jharia: coking coal; Bailadila: iron ore; Khetri: copper; Panna: diamonds.

PRACTICE

10. Which one of the following statements is NOT correct?

A. Haematite is a high-grade iron ore.

B. Monazite sands are a source of thorium.

C. Neyveli is known for lignite.

D. Bauxite is the main ore of copper.

Answer: D. Bauxite is the ore of aluminium.

PRACTICE

11. Consider the following statements about Andhra Pradesh:

1. The Godavari splits into the Gautami and Vasishta branches near Dowleswaram.

2. Kolleru lake lies between the Godavari and Krishna deltas.

3. Pulicat is the largest freshwater lake in India.

Which of the above are correct?

A. 1 only

B. 2 only

C. 1 and 2 only

D. 1, 2 and 3

Answer: C. Pulicat is a brackish-water lagoon (second largest after Chilika); Wular is the largest freshwater lake.

PRACTICE

12. During which period is the Andhra Pradesh coast most likely to be hit by severe cyclones?

A. January–February

B. October–December

C. July–August

D. March–April

Answer: B. The post-monsoon months (October–December), with May as a secondary peak, bring most severe Bay of Bengal cyclones.

PRACTICE

13. Match List-I (river in AP) with List-II (project):

List-I (river in AP)	List-II (project)
A. Godavari	1. Gotta barrage
B. Krishna	2. Somasila
C. Pennar	3. Srisailam
D. Vamsadhara	4. Polavaram

(1) A → 3 B → 4 C → 2 D → 1

(2) A → 4 B → 2 C → 3 D → 1

(3) A → 4 B → 3 C → 1 D → 2

(4) A → 4 B → 3 C → 2 D → 1

Answer: (4) Godavari: Polavaram; Krishna: Srisailam; Pennar: Somasila; Vamsadhara: Gotta.

PRACTICE

14. Arrange the following in chronological order:

1. TISCO at Jamshedpur

2. Bhilai steel plant

3. Visakhapatnam steel plant commissioned

4. First modern cotton mill in Bombay

Select the correct order:

A. 4, 1, 2, 3

B. 1, 4, 2, 3

C. 4, 2, 1, 3

D. 4, 1, 3, 2

Answer: A. Cotton mill 1854 → TISCO 1907 → Bhilai 1959 → Vizag 1992.

PRACTICE

15. Consider the following statements:
I. Ahmedabad is called the 'Manchester of India'.
II. Coimbatore is called the 'Manchester of South India'.
Which of the statements given above is/are correct?

A. I only

B. II only

C. Both I and II

D. Neither I nor II

Answer: C. Both are correct.

PRACTICE

16. Consider the following pairs:
1. Chennai – 'Detroit of India'
2. Bengaluru – 'Silicon Valley of India'
3. Jamnagar – largest coal mine
4. Kanpur – centre of jute mills
How many of the above pairs are correctly matched?

A. Only one pair

B. Only two pairs

C. Only three pairs

D. All four pairs

Answer: B. Jamnagar is known for oil refining; jute mills are along the Hugli (Kanpur is known for leather and cotton textiles).

PRACTICE

17. Which one of the following statements is NOT correct?

A. The Kia car plant is in Srikakulam district.

B. Sri City is in Tirupati district.

C. The Jawaharlal Nehru Pharma City is at Parawada near Visakhapatnam.

D. Orvakal in Kurnool district was chosen as an industrial smart city node.

Answer: A. The Kia plant is at Penukonda in Sri Sathya Sai district.

PRACTICE

18. Which of the following industries is most likely to be located close to its raw material?

A. Software development

B. Diamond cutting

C. Garment stitching

D. Sugar milling

Answer: D. Sugarcane is bulky, weight-losing and perishable, so sugar mills are built near cane fields.

PRACTICE

19. Consider the following statements:
1. 'Loo' is a hot, dry wind of the northern plains in summer.
2. Western disturbances bring winter rain to north-west India.
3. Kal Baisakhi storms occur in West Bengal.
4. Mango showers are pre-monsoon showers of Punjab.
Which of the above are correct?

A. 1 and 2 only

B. 2, 3 and 4 only

C. 1, 2 and 3 only

D. 1, 2, 3 and 4

Answer: C. Mango showers occur in Kerala and coastal Karnataka.

PRACTICE

20. Assertion (A): Himalayan rivers are perennial.

Reason (R): They are fed by melting snow and glaciers as well as by rain.

Choose the correct answer:

A. Both A and R are true and R is the correct explanation of A

B. Both A and R are true but R is not the correct explanation of A

C. A is true but R is false

D. A is false but R is true

Answer: A. Both are true, and the snow-and-glacier supply explains why they flow all year.

PRACTICE

21. Match List-I (drainage pattern) with List-II (example):

List-I (drainage pattern)	List-II (example)
A. Dendritic	1. Rivers draining into Loktak lake
B. Radial	2. Old folded uplands of Singhbhum
C. Trellis	3. Rivers flowing out from Amarkantak
D. Centripetal	4. Ganga plains

(1) A → 4 B → 3 C → 2 D → 1

(2) A → 3 B → 4 C → 2 D → 1

(3) A → 4 B → 2 C → 3 D → 1

(4) A → 4 B → 3 C → 1 D → 2

Answer: (1) Dendritic: Ganga plains; radial: Amarkantak; trellis: folded Singhbhum; centripetal: Loktak.

PRACTICE

22. Which one of the following statements is NOT correct?

A. Barren Island in the Andamans has an active volcano.

B. The Ten Degree Channel separates the Andaman and Nicobar groups.

C. The Lakshadweep islands are of volcanic origin.

D. Kavaratti is the capital of Lakshadweep.

Answer: C. Lakshadweep islands are coral (atoll) islands.

PRACTICE

23. Consider the following statements:

1. In 2025 India reached 50% of installed power capacity from non-fossil sources.

2. Gujarat and Tamil Nadu lead in wind power.

3. Kudankulam nuclear power plant is in Tamil Nadu.

4. Rajasthan leads in solar capacity.

Which of the above are correct?

A. 1 and 2 only

B. 2, 3 and 4 only

C. 1, 2 and 3 only

D. 1, 2, 3 and 4

Answer: D. All four are correct.

PRACTICE

24. Consider the following statements:

I. Kharif crops are sown with the onset of the south-west monsoon.

II. Wheat is the main kharif crop of India.

Which of the statements given above is/are correct?

A. I only

B. II only

C. Both I and II

D. Neither I nor II

Answer: A. Wheat is the main rabi crop; rice is the main kharif crop.

PRACTICE

25. A planter in Assam has well-drained hill slopes, heavy rainfall and a warm, humid climate. Which crop suits these conditions best?

A. Tea

B. Wheat

C. Cotton

D. Mustard

Answer: A. Tea needs heavy rain but no waterlogging, so it grows on hill slopes; Assam is the largest producer.

PRACTICE

26. Consider the following pairs (place – resource):
1. Digboi – petroleum
2. Neyveli – lignite
3. Kudremukh – iron ore
4. Mangampet – mica
How many of the above pairs are correctly matched?

A. Only one pair

B. Only two pairs

C. Only three pairs

D. All four pairs

Answer: C. Mangampet (YSR Kadapa) is known for barytes; the mica belt is Gudur–Nellore.

PRACTICE

27. Which period does the Sendai Framework for Disaster Risk Reduction cover?

A. 2005–2015

B. 2015–2030

C. 1994–2005

D. 2030–2045

Answer: B. Sendai covers 2015–2030; Hyogo covered 2005–2015.

PRACTICE

28. Which one of the following statements is NOT correct?

A. INCOIS, Hyderabad runs India's tsunami early warning centre.

B. The Geological Survey of India is the nodal agency for landslides.

C. The NDMA is chaired by the Prime Minister.

D. The NDRF works under the Ministry of Defence.

Answer: D. The NDRF is under the Ministry of Home Affairs.

PRACTICE

29. Which State has the largest share of India's coking coal reserves, with the famous Jharia field?

A. Jharkhand

B. Odisha

C. Telangana

D. Tamil Nadu

Answer: A. Jharkhand (Jharia, Bokaro) holds most of India's coking coal.

PRACTICE

30. Arrange the following in chronological order:

1. Indus Waters Treaty

2. Foundation of the Ken–Betwa link project

3. Inter-State River Water Disputes Act

4. National Perspective Plan for river linking

Select the correct order:

A. 1, 3, 4, 2

B. 3, 4, 1, 2

C. 3, 1, 4, 2

D. 3, 1, 2, 4

Answer: C. ISRWD Act 1956 → IWT 1960 → National Perspective Plan 1980 → Ken–Betwa foundation December 2024.

RECALL BOX: CLOSE THE NOTES AND WRITE THESE IN YOUR OWN WORDS

After the test: score = correct − (wrong ÷ 3). For each wrong answer write the question number, the correct fact in one line and its topic (physical, climate, rivers, soils/forests, resources, agriculture, industry, disasters, AP). Re-read only those parts.

NOTEBOOK PAGE · Day 40: write this from memory

Close the notes. Write these headings, fill every blank, then correct in a different colour.

GEOGRAPHY: Industries and industrial regions

Area	Write
Basics	Location factors; kinds of industry; industrial policies 1948, 1956, 1991; MSME definition; Make in India, PLI; IIP and core industries
Industries	Steel plants with years and partners; textiles, jute, sugar, cement, aluminium, petrochemicals, autos, IT, pharma, electronics with centres; industrial regions and corridors; AP's industrial hubs

ECONOMY: BOP and FDI

- BOP accounts and items; trade vs current vs capital account; CAD causes and financing; 1991 crisis; convertibility; exchange rate regimes; reserves; latest BOP figures; FDI vs FPI (10%); routes, caps, prohibited sectors, Press Note 3; top sources and sectors; FEMA, ECB, remittances.

PRACTICE: Geography test

Write your score and the topic of each wrong answer (physical, climate, rivers, soils and forests, resources, agriculture, industry, AP, disasters); re-read those parts.
