HISTORY · Delhi Sultanate: administration, society, economy

UNDERSTAND IT FIRST

What is it? From **1206 to 1526** Turkish and Afghan Sultans ruled from **Delhi**, five dynasties one after another. For the first time a **Muslim state** governed much of north India, then reached the Deccan. It changed **administration** (iqta, cash salaries, market control), **economy** (coins, towns, crafts), **society** (a new ruling class) and **religion** (Sufism, Bhakti), and it ended with the **Mughals** after the **First Battle of Panipat (1526)**. Learn it as **Sources → Dynasties and rulers → Administration → Politics · Society · Economy · Religion → Architecture and literature → Decline**.

The five dynasties

5. Decline

Causes: a **vast empire** held by force, **no fixed succession**, nobles' revolts, **Muhammad bin Tughlaq's failed experiments**, new kingdoms (**Vijayanagara**, **Bahmani**, Bengal, Jaunpur, Gujarat), **Timur's invasion (1398)** which broke the treasury and army, weak Sayyids and Lodis, and finally **Babur's victory at Panipat (1526)**.

POLITY · Basic Structure of the Constitution

UNDERSTAND IT FIRST

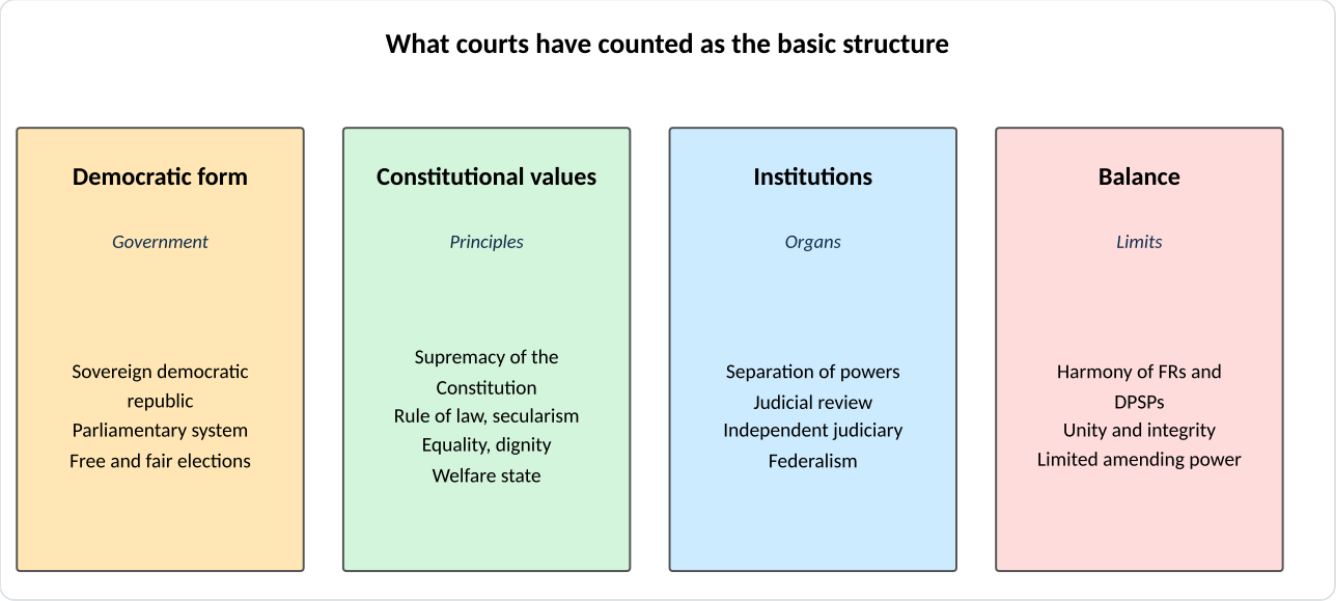

What is it? Article 368 lets Parliament amend the Constitution. If this power had no limit, Parliament could, by amendments, remove democracy, rights or even the Constitution itself. The Supreme Court answered: Parliament may amend, but it **cannot destroy or change the 'basic structure' (basic features)** of the Constitution. The words 'basic structure' are **not in the Constitution**: it is a **judge-made doctrine**, drawn out case by case. The idea was first suggested by the German scholar **Dietrich Conrad** (1965, a lecture at Banaras Hindu University).

1. How the doctrine developed

Case / change	What happened
Shankari Prasad (1951) → Sajjan Singh (1965)	Parliament's power to amend is **wide**, including FRs.
Golaknath v. State of Punjab (1967)	11 judges (6:5): Parliament **cannot amend** FRs.
24th and 25th Amendments (1971)	Parliament restored its power to amend FRs; Art 31C added.
Kesavananda Bharati v. State of Kerala (24 April 1973)	The **largest bench (13 judges)**, **7:6**, under **Chief Justice S.M. Sikri**: Golaknath **overruled**; Parliament can amend **any part including FRs** but **cannot alter the basic structure**. (Swami Kesavananda challenged Kerala's land reform laws; **Nani Palkhivala** argued for him.)
Indira Nehru Gandhi v. Raj Narain (1975)	Struck down the **39th Amendment** clause that put the Prime Minister's election beyond court review: **free and fair elections** and **rule of law** are basic structure.
42nd Amendment (1976)	Tried to remove all limits on amending power and court review.
Minerva Mills v. Union of India (1980)	Struck down that clause: **limited amending power**, **judicial review** and the **balance between FRs and DPSPs** are basic structure.
Waman Rao (1981)	Only amendments after **24 April 1973** are tested for basic structure.
S.R. Bommai v. Union of India (1994)	**Secularism** and **federalism** are basic structure; President's Rule (Art 356) can be reviewed by courts.
L. Chandra Kumar (1997)	**Judicial review** by High Courts and Supreme Court (Arts 226, 32) cannot be taken away, even for tribunals.
I.R. Coelho (2007)	Laws placed in the **Ninth Schedule** after 1973 can be reviewed on the basis of basic structure and fundamental rights.
Supreme Court Advocates-on-Record Association v.	Struck down the **99th Amendment and the NJAC Act** (a commission to appoint judges) as against the **independence of the judiciary**; the **collegium** system

Union of India (2015)	continued.

2. What counts as basic structure

Features recognised by courts

There is **no fixed list**; the list is **open** and grows case by case. In **Kesavananda** the judges named: **supremacy of the Constitution**, **republican and democratic form**, **secular character**, **separation of powers**, **federal character**, and **individual freedom** and the Preamble's aims; later cases added **judicial review**, **independence of the judiciary**, **free and fair elections**, **rule of law**, **welfare state**, **equality**, **harmony of FRs and DPSPs** and **limited power to amend**.

EXAMPLE

Three points to remember: (1) It is **not written** in the Constitution; courts **find it case by case**. (2) It is used mainly to test **constitutional amendments** (an ordinary law is tested against Part III and the division of powers). (3) It protects the **identity** of the Constitution, but it does **not freeze** the Constitution: Parliament can still amend the parts that are not basic.

EXAM TRAP

Kesavananda Bharati (1973): 13 judges, 7:6, basic structure; Golaknath overruled. Indira Gandhi v. Raj Narain (1975): free and fair elections. **Minerva Mills (1980)**: limited amending power, FR–DPSP balance. **Bommai (1994)**: secularism, federalism. **Coelho (2007)**: Ninth Schedule. **NJAC case (2015)**: independence of judiciary. Source of the idea: **Germany (Dietrich Conrad)**. Not defined in the Constitution.

Test yourself: 5 questions (tap an option to see the answer)

PRACTICE

Consider the following statements about the Kesavananda Bharati case (1973):

1. It was decided by a bench of 13 judges.

2. The majority was 7:6.

3. It overruled the Golaknath decision.

4. It held that Parliament cannot amend Fundamental Rights at all.

Which of the above are correct?

A. 1, 2 and 3 only

B. 1 and 4 only

C. 2, 3 and 4 only

D. 1, 2, 3 and 4

Answer: A. Kesavananda allows amendment of FRs but not of the basic structure; 4 describes Golaknath.

PRACTICE

Match List-I (case) with List-II (point decided):

List-I (case)	List-II (point decided)
A. Kesavananda Bharati	**1.** Free and fair elections are basic structure
B. Indira Gandhi v. Raj Narain	**2.** Basic structure doctrine
C. Minerva Mills	**3.** Limited amending power and FR–DPSP balance
D. S.R. Bommai	**4.** Secularism and federalism

(1) A → 2 B → 1 C → 3 D → 4

(2) A → 1 B → 2 C → 3 D → 4

(3) A → 2 B → 1 C → 4 D → 3

(4) A → 3 B → 1 C → 2 D → 4

Answer: (1) Kesavananda: doctrine; Raj Narain: elections; Minerva Mills: balance; Bommai: secularism and federalism.

PRACTICE

Which one of the following statements about the basic structure doctrine is NOT correct?

A. The Constitution does not list the basic features.

B. The Supreme Court struck down the 99th Amendment (NJAC) in 2015 on this ground.

C. The Kesavananda judgment was unanimous.

D. It limits Parliament's power to amend the Constitution.

Answer: C. Kesavananda was decided 7:6, a narrow majority.

PRACTICE

Assertion (A): Parliament cannot, by an amendment under Article 368, destroy the basic structure of the Constitution.
Reason (R): Article 368 gives the power to amend the Constitution, not the power to replace it with a new one.
Choose the correct answer:

A. Both A and R are true and R is the correct explanation of A

B. Both A and R are true but R is not the correct explanation of A

C. A is true but R is false

D. A is false but R is true

Answer: A. The power to 'amend' does not include power to abrogate the identity of the Constitution.

PRACTICE

Parliament passes a constitutional amendment saying that no court can examine the validity of any future constitutional amendment. What will the Supreme Court most likely do?

A. Strike it down, as judicial review is part of the basic structure (Minerva Mills)

B. Uphold it, as Parliament is supreme

C. Refer it to the President for approval

D. Ask the State legislatures to ratify it

Answer: A. Minerva Mills struck down a similar clause: limited amending power and judicial review are basic.

RECALL BOX: CLOSE THE NOTES AND WRITE THESE IN YOUR OWN WORDS

1. Write the cases in order from Shankari Prasad to the NJAC case with one line each. 2. Draw the four groups of features. 3. Write the three points to remember.

REASONING · Courses of action; deductive, inductive and abductive reasoning

UNDERSTAND IT FIRST

What is it? Part A: a **statement** describes a **problem**, and **courses of action** are steps to deal with it. You decide which course **should be followed**. Part B: three ways of **reasoning**, which APPSC reasoning questions test through examples.

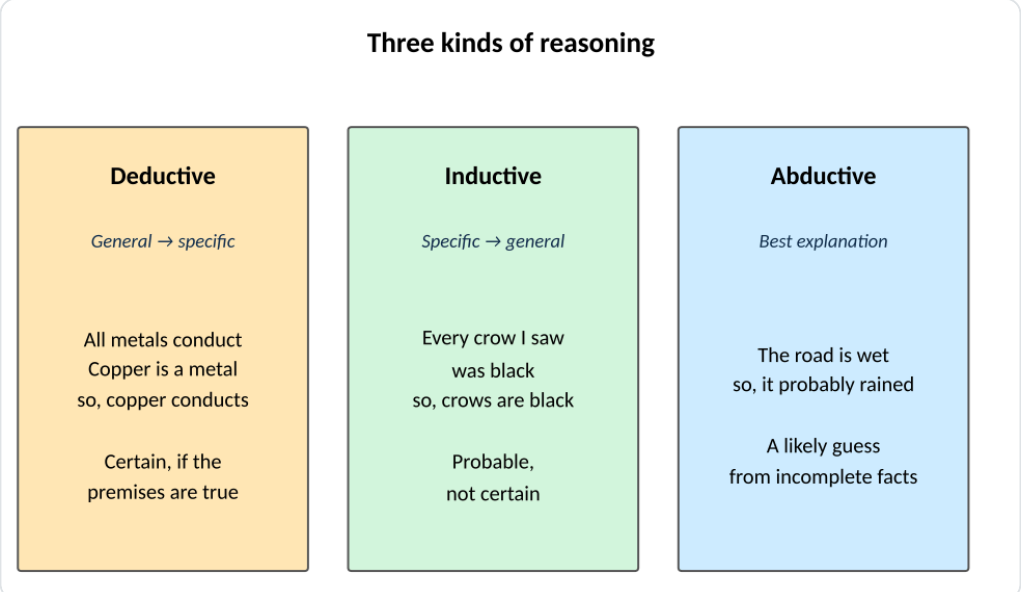

Part A · Courses of action

A good course of action is...	A poor one is...
Practical and possible for the authority	**Impossible** or too costly
Directly related to the problem	**Unrelated** or only for show
Balanced and fair; a step to **improve** or **investigate**	**Extreme or harsh** (ban everything, punish all, close down)
A **new** step, not already in the statement	A **comment** or only a **delay** ('wait and see')

EXAMPLE

Example: Statement: 'Many people complain that the Gram Sachivalayam office is closed during working hours.' Course I: 'Officials should explain their absence and attendance should be monitored.' It is **direct, practical and fair**, so it **follows**. Course II: 'The office should be closed permanently.' It is **extreme**, so it **does not follow**.

Part B · Deductive, inductive and abductive reasoning

Three kinds of reasoning

Kind	Direction	Strength of conclusion	Clue words / example

Deductive	**General rule → specific case**	**Certain** if the premises are true (valid argument)	'All A are B; x is A; so x is B'. All birds have feathers; a sparrow is a bird; so it has feathers.
Inductive	**Specific cases → general rule**	**Probable**, never certain; more cases make it stronger	'Every crow I have seen is black, so all crows are black.' (generalisation, pattern, sample)
Abductive	**Observation → best explanation**	A **likely guess**, to be tested later (Charles Peirce)	'The road is wet, so it probably rained.' (doctor's diagnosis, detective's guess)

EXAM TRAP

Deductive: top-down, certain. **Inductive**: bottom-up, probable. **Abductive**: best explanation, a guess. A **valid** deductive argument can still have a **false** conclusion if a premise is false; a **sound** one has valid logic **and** true premises. For courses of action: practical, direct, not extreme, not just a comment.

Test yourself: 5 questions (tap an option to see the answer)

PRACTICE

Statement: Many people have complained that the Gram Sachivalayam office remains closed during working hours.
Courses of action:
I. The officials should be asked to explain their absence and attendance should be monitored.
II. The office should be closed permanently.
Which of the courses of action follows?

A. Only I

B. Only II

C. Both I and II

D. Neither I nor II

Answer: A. I is direct and practical; II is extreme.

PRACTICE

Statement: The water level in the village tank has fallen sharply because of low rainfall.
Courses of action:
I. The authorities should promote water saving and rainwater harvesting.
II. All farming in the area should be banned immediately.
III. Borewells should be dug without any limit.
Which of the courses of action follow?

A. Only I

B. I and II only

C. II and III only

D. I, II and III

Answer: A. II is extreme and III makes the water problem worse.

PRACTICE

'The streets are wet this morning, so it probably rained last night.' This is an example of

A. Abductive reasoning

B. Deductive reasoning

C. Inductive reasoning

D. A valid syllogism

Answer: A. It infers the likeliest explanation from one observation.

PRACTICE

Match the argument in List-I with its type in List-II:

List-I	List-II
A. All metals conduct electricity; copper is a metal; so copper conducts electricity.	**1.** Deductive
B. Every crow I have seen is black; so all crows are black.	**2.** Inductive
C. The room is dark and the bulb is cold; so there was probably a power cut.	**3.** Abductive

(1) A → 1 B → 2 C → 3

(2) A → 2 B → 1 C → 3

(3) A → 1 B → 3 C → 2

(4) A → 3 B → 2 C → 1

Answer: (1) A: general to specific (deductive); B: specific to general (inductive); C: best explanation (abductive).

PRACTICE

Consider the following statements about types of reasoning:

1. In a valid deductive argument, if the premises are true the conclusion must be true.

2. An inductive conclusion is probable, not certain.

3. Abductive reasoning looks for the best possible explanation of the observations.

4. Abductive reasoning always gives a certain conclusion.

Which of the above are correct?

A. 1, 2 and 3 only

B. 1 and 4 only

C. 2, 3 and 4 only

D. 1, 2, 3 and 4

Answer: A. Abductive conclusions are only likely guesses.
