HISTORY · Shivaji and the rise of the Maratha Empire

UNDERSTAND IT FIRST

What is it? In the 17th century, while the Mughal Empire was at its widest, a **new regional power** rose in the **hills and forts of the Western Ghats (Maharashtra)**. **Shivaji** turned a small jagir into an independent **Swaraj** (self-rule) with a **disciplined army, a navy, a sound revenue system and a council of ministers**. After him the **Peshwas** made the Marathas the **strongest power in India** until **1761**, and the British finally ended Maratha rule in **1818**. Learn it as **Background → Shivaji's rise → Administration → Politics · Society · Economy · Religion → Successors and Peshwas → Fall**.

Rise and fall of the Marathas

1. Background and early life

- **Land and people:** the **Deccan plateau and Western Ghats** gave **hill forts, narrow passes and the hardy Mavala hill soldiers**. The **Bhakti saints** (Jnaneshwar, Eknath, Tukaram, Ramdas) built a **Marathi pride and unity** across castes. The **Deccan Sultanates** of **Ahmednagar and Bijapur** employed Maratha chiefs, so the Marathas learnt **warfare and administration**; **Malik Ambar** (Ahmednagar) taught **guerrilla war** and a **land-revenue system** that Shivaji later improved.
- **Shivaji** was born at **Shivneri fort** (near Junnar) in **1630** (traditional date; some sources give 1627), son of **Shahaji Bhonsle** (a Bijapur noble with a jagir at **Pune**) and **Jijabai**. His guardian **Dadoji Konddev** trained him in administration and war; **Ramdas** and **Tukaram** shaped his ideals.

2. Shivaji's rise: key events

Year	Event
1646	Captured **Torna** fort, his first, at about age 16; later **Kondhana (Sinhagad)**, **Purandar**, **Rajgad** (his first capital).
1656	Took **Javli** from the Maratha chief **Chandrarao More**, giving him the **Konkan** and **Mahabaleshwar** area.
1659	**Afzal Khan**, sent by Bijapur, was killed by Shivaji at **Pratapgad** (with the **wagh nakh**, 'tiger claw'); victory at Pratapgad made him famous.
1660	Siege of **Panhala** by Siddi Jauhar; Shivaji escaped and **Baji Prabhu Deshpande** held the **Pavan Khind** pass and died, giving him time.
1663	A night attack on the Mughal governor **Shaista Khan** at **Pune** (Lal Mahal); Shaista Khan lost fingers.
1664, 1670	**Sacked Surat**, the Mughal port and richest city of the west (twice).

1665	**Treaty of Purandar** with Mirza Raja **Jai Singh**: Shivaji gave up **23 of 35 forts** and agreed to serve the Mughals; his son **Sambhaji** got a mansab.
1666	Visited **Aurangzeb at Agra**, was insulted and put under guard, and **escaped** (traditionally hidden in a basket).
1670	Recaptured the surrendered forts, e.g. **Sinhagad** (**Tanaji Malusare** died winning it: 'the fort is won but the lion is lost').
1674	**Coronation at Raigad** (6 June) by the Banaras scholar **Gaga Bhatt**; title **Chhatrapati**, also **Haindava Dharmoddharak**.
1676–78	**Karnataka expedition**: alliance with **Golconda** (Abul Hasan Qutb Shah; met at **Hyderabad**, 1677), visited **Srisailam**, took **Jinji** and **Vellore**; half-brother **Ekoji (Vyankoji)** ruled **Thanjavur** (the Maratha line there).
1680	Shivaji died at **Raigad** (3 April).

3. Administration

Ashta Pradhan

- **Ashta Pradhan** (council of eight ministers): **Peshwa** (prime minister), **Amatya** (finance), **Mantri** (royal records), **Sachiv** (correspondence), **Sumant** (foreign affairs), **Senapati** (army), **Pandit Rao** (religion and charity) and **Nyayadhish** (justice). They were **advisers, not hereditary**; all but the Pandit Rao and Nyayadhish **led armies**. The king held the final power.
- **Territory: Swaraj** (his own core, directly governed: Pune, Konkan), **Mughlai** (neighbouring lands paying **Chauth and Sardeshmukhi**) and the **Karnataka** conquests.
- **Revenue:** land was **measured** (rod, **kathi**) and classed by fertility (survey under **Annaji Datto**); the State took **about one-third**, later **two-fifths** of the produce, collected **directly** from the cultivators, so the **deshmukhs and jagirdar middlemen lost power**; **chauth** (**one-fourth** of the revenue of neighbouring lands, as a payment for protection from his raids) and **sardeshmukhi** (an extra **10%**, as hereditary head of the Deshmukhs). Coins: **hon** (gold), **shivrai** (copper).
- **Army:** a loyal, paid **standing army**; **infantry** (Mavalas), **cavalry** of **bargirs** (horses and arms supplied by the State) and **shiledars** (own horses), strict discipline, no women or plunder from the poor; a **navy** with bases at **Kolaba** and **Sindhudurg**; about **300 hill forts**, each under **three officers of different communities** (**havaldar, sabnis, sarnobat**) who checked one another; a good **spy system** (Bahirji Naik).

4. Politics · Society · Economy · Religion

Area	Marathas

Politics	**Swaraj** under a **Chhatrapati** with an **Ashta Pradhan**; **guerrilla (ganimi kava)** war; forts and mobility; later the **Peshwas** (Chitpavan Brahmin ministers) held real power at **Pune** while the Chhatrapati at **Satara** became a figurehead; a **confederacy** of **Peshwa, Scindia (Gwalior), Holkar (Indore), Gaekwad (Baroda) and Bhonsle (Nagpur)**.
Society	Strong **peasant (Kunbi/Maratha)** and **Mavala** base; **deshmukhs** and **watandars** controlled by the State; **Brahmin** administrators; shared **Marathi culture** and **Bhakti** (Varkari); Shivaji ordered **honour for women** and **no harm to mosques and the Quran**.
Economy	**Raiyatwari-like** direct collection; **chauth and sardeshmukhi** from neighbours; **plunder of Surat**; ports and a navy for **trade and defence**; forts as **storehouses**; the Peshwas' bankers and **hundis** later made **Pune** a financial centre.
Religion and language	Shivaji was a devout **Hindu** (**Bhavani**, Tukaram, Ramdas) but **tolerant**; he made **Marathi and Sanskrit** the court languages and had **Raghunath Pandit** prepare the **Rajyavyavahar Kosh** to replace Persian words; he supported temples and gave grants to **mosques and dargahs** too.

5. After Shivaji: successors and Peshwas

Ruler	Key facts
Sambhaji (1680–89)	Fought the Mughals; **captured and executed by Aurangzeb (1689)**; his son **Shahu** was held by the Mughals.
Rajaram (1689–1700), **Tarabai**	Rajaram ruled from **Jinji** (Tamil Nadu) and then Satara; his widow **Tarabai** led the war for her young son (**Shivaji II**) after 1700.
Shahu (1707–49)	Released after Aurangzeb's death (1707); won the **Battle of Khed (1707)** over Tarabai; **Maratha state split** into **Satara (Shahu)** and **Kolhapur (Tarabai's line)**; he made **Balaji Vishwanath** his Peshwa.
Balaji Vishwanath (1713–20)	First great Peshwa; the **1719 treaty with the Syed brothers** of Delhi gave **chauth and sardeshmukhi of six Mughal subahs of the Deccan** and recognised Shahu's swaraj: called the **'Magna Carta of the Marathas'**.
Baji Rao I (1720–40)	Greatest Peshwa, never lost a battle; defeated the **Nizam at Palkhed (1728)**; raided **Delhi (1737)**; **Bhopal (1738)** against the Nizam; took **Bassein (1739)** from the Portuguese; built **Shaniwar Wada** at Pune; spread Maratha power into **Malwa, Gujarat and Bundelkhand**.
Balaji Baji Rao (Nana Saheb, 1740–61)	Maratha power reached the **Punjab and Attock**; the Peshwa became the real head after **Shahu's death (1749)**; lost the **Third Battle of Panipat (14 January 1761)** to **Ahmad Shah Abdali**: **Sadashivrao Bhau** and **Vishwasrao** died.
Madhavrao I (1761–72), **Mahadji Scindia**, **Nana Phadnavis**	Madhavrao **recovered** Maratha power after Panipat; **Mahadji Scindia** restored the Marathas at **Delhi** (1771, took **Shah Alam II** under protection); **Nana Phadnavis** was the able minister.

6. Fall: the Anglo-Maratha Wars

War	Facts
First (1775–82)	Began when the British backed **Raghunath Rao** (Raghoba) against the Peshwa's ministers; **Treaty of Salbai (1782)** (mediated by **Mahadji Scindia**) restored the position and gave 20 years of peace.
Second (1803–05)	**Baji Rao II** signed the **Treaty of Bassein (1802)** accepting Wellesley's **Subsidiary Alliance**; Scindia and Bhonsle resisted and lost (**Assaye, Argaon**); treaties of **Deogaon** and **Surji-Anjangaon** (1803), **Rajghat** (Holkar, 1805).
Third (1817–19)	Peshwa **Baji Rao II** rose against the British, lost at **Khadki** and **Koregaon (Bhima Koregaon, 1 Jan 1818)**, **surrendered in 1818**, was pensioned at **Bithur**; the **Peshwaship was abolished** and the **Maratha power ended**.

Why they fell: loss at **Panipat (1761)**, **rivalry among the confederacy chiefs**, the Peshwas' neglect of **navy and modern artillery**, and **British diplomacy** that split the chiefs.

POLITY • State executive and legislature: Governor, Chief Minister, Legislature

UNDERSTAND IT FIRST

What is it? Every State copies the Union's model: a **Governor** (nominal head, like the President), a **Chief Minister and Council of Ministers** (real power, like the PM and Council) and a **State Legislature** (like Parliament). The Constitution's **Part VI** (Articles 152–237) deals with the States. Learn it as **Governor → Chief Minister and Council → Legislature → President's Rule**.

The State executive and legislature

1. The Governor

Point	Details
Appointment (Art 153–156)	Each State has a Governor (one person can serve **two or more States**, **7th Amendment 1956**); **appointed by the President** by warrant; holds office **during the President's pleasure**; normal term **5 years**.

2. The Chief Minister and the Council of Ministers

- **Art 164:** the **CM is appointed by the Governor**, who invites the **leader of the majority** in the Assembly; other ministers are appointed **on the CM's advice**; they hold office **during the Governor's pleasure** and are **collectively responsible to the Legislative Assembly**. The **CM is the link** between the Governor and the Council, **heads the Council**, and chairs the **Cabinet**; the **Chief Secretary** heads the **permanent civil service** in the State.

Sessions	**Gap ≤ 6 months** (Art 174); **quorum 10 members or 1/10, whichever is more** (Art 189).	Same

4. President's Rule in a State

- **Art 355:** the Union must protect every State against external aggression and internal disturbance. **Art 356:** if the President is satisfied, on the **Governor's report or otherwise**, that the **government of the State cannot be carried on according to the Constitution** (**failure of constitutional machinery**), he can take over the State's executive; the **Assembly is suspended or dissolved**; Parliament makes laws for the State.
- **Approval:** by **both Houses within 2 months** (simple majority); lasts **6 months**, extendable by 6 months each time up to a maximum of **3 years**; beyond **1 year** only if a **National Emergency** is in force **and** the **Election Commission** certifies that elections cannot be held (**44th Amendment**). **S.R. MATHS · Percentage

UNDERSTAND IT FIRST

What is it? Percent means **'per hundred'** (Latin *per centum*). **x%** is simply **x/100**. A percentage lets us **compare** quantities on a **common scale of 100**: 18 out of 25 and 36 out of 50 look different, but both are **72%**. Percentages are used in **marks, profit, discount, interest, population, elections and budgets**, so this topic supports many later topics.

Percentage: the key rules

1. Fraction–percentage table (learn by heart)

Fraction	%	Fraction	%	Fraction	%
1/2	50	1/7	14 2/7	1/12	8 1/3
1/3	33 1/3	1/8	12.5	1/15	6 2/3
1/4	25	1/9	11 1/9	1/16	6.25
1/5	20	1/10	10	1/20	5
1/6	16 2/3	1/11	9 1/11	1/25	4

2. Rules and shortcuts

Situation	Rule	Example
x% of y	(x/100) × y; also **x% of y = y% of x**	8% of 25 = 25% of 8 = 2
Percentage change	**(change ÷ original) × 100**	50 → 60: 10/50 = 20% increase
A is x% more than B	B is **100x ÷ (100 + x)%** less than A	A is 25% more than B: B is 20% less than A
Successive changes x% and y%	Net change = **x + y + xy/100** (use negative for a decrease)	+20% then −10%: 20 − 10 − 2 = **+8%**
Equal rise then fall (x% each)	Net **loss of $x^2/100$ %**	+20% then −20%: net −4%
Price rises x%	Cut consumption by **100x ÷ (100 + x)%** to keep expenditure same	Sugar up 25%: use 20% less
Side of a square / radius changes x%	Area changes **$2x + x^2/100$ %**	Side +10%: area +21%
Population / growth	**$P \times (1 + r/100)^n$** after n years; a fall uses (1 − r/100)	10,000 at +10% then +20%: 13,200
Elections	Winner's % − loser's % = **margin %** of valid votes; invalid votes are **not** counted	55% vs 45%: margin 10%
Percentage points vs percent	From 20% to 25% is **5 percentage points** but a **25% increase** (5/20)	

EXAMPLE

Why a rise and an equal fall do not cancel: take ₹100, add 20% = ₹120; now take 20% **of ₹120** (₹24) = ₹96. The fall is on a **bigger base**, so the result is **4% lower**. Always ask: **percent of what?** The **base** (the original) is the number after 'of' or 'than'.

EXAM TRAP

x% = x/100; change ÷ original × 100; successive: x + y + xy/100; rise and equal fall: −x²/100 %; reverse: 100x/(100 + x); area: 2x + x²/100; growth: P(1 + r/100)ⁿ; 1/8 = 12.5%, 1/6 = 16.67%, 1/7 = 14.29%, 1/9 = 11.11%.

Test yourself: 5 questions (tap an option to see the answer)

PRACTICE

The price of an article is first increased by 20% and then decreased by 20%. If the final price is ₹960, what was the original price?

A. ₹1,000

B. ₹1,040

C. ₹950

D. ₹960

Answer: A. Net change = 20 − 20 − 4 = −4%, so final = 96% of original; 960 ÷ 0.96 = ₹1,000.

PRACTICE

If A's salary is 25% more than B's salary, then B's salary is what percent less than A's salary?

A. 20%

B. 25%

C. 18%

D. 22.5%

Answer: A. 100 × 25 / 125 = 20%.

PRACTICE

In an election between two candidates the winner gets 55% of the valid votes and wins by 2,400 votes. What is the total number of valid votes?

A. 20,000

B. 24,000

C. 26,000

D. 30,000

Answer: B. Winner 55%, loser 45%; margin 10% = 2,400, so total = 24,000.

PRACTICE

The population of a town is 10,000. It increases by 20% in the first year and decreases by 10% in the second year. What is the population after two years?

A. 10,800

B. 11,000

C. 10,200

D. 10,000

Answer: A. 10,000 × 1.2 × 0.9 = 10,800 (net +8%).

PRACTICE

If the side of a square is increased by 10%, by what percent does its area increase?

A. 20%

B. 21%

C. 22%

D. 10%

Answer: B. $2 \times 10 + 10^2/100 = 21\%$; check: $1.1^2 = 1.21$.
